## Front-end Developer

React developer - Vue developer

Hi, I'm an experienced Front-end Developer with a strong background in building modern, responsive web applications.

My development journey began in 2016, and over the years, I've honed my skills working with JavaScript frameworks like React and Vue.js. I have solid experience with ES6, CSS preprocessors (Sass/SCSS), and modern front-end workflows.

I strive to build front-end solutions that are not only visually appealing but also performant and maintainable. Continuous improvement is at the core of my work — from learning emerging technologies to refining existing skills.

Let's build something great together!

## Experience

### Front-end developer

Feb 2020 — *Present*

- Development of projects of varying complexity using React, Next.js, Vue.js and Nuxt.js,
- Development of new projects of varying complexity; layout integration into WordPress CMS
